## **DETAILED ACTION**

### ***Double Patenting***

1. Claim 5 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim
4. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilgus (4,845,817). Wilgus discloses a bearing shell for a crankshaft thrust bearing having a cylindrical shell, the inside surface of the shell forming a radial bearing surface for the crankshaft, and flanges (18) at both ends of the shell directed radially outward, the outer surfaces of the flanges forming an axial bearing surface for the crankshaft, the bearing shell comprising at least one oil passage (14) running circumferentially on an inside surface of the shell, an axial groove (located between the flanges) running along an outside of a crankshaft bearing shell and a orifice (16) passing through said shell connecting said oil passage to said groove so that oil may be provided to the flanges.

Art Unit: 3682

Wilgus further discloses clearance spaces, or openings located where the two shells meet, for oil distribution.

*Response to Arguments*

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
